

Al Hassan Engineering Company achieves 2mn LTI free man-hours

Al Hassan Engineering Company, Oman's leading EPC Contractor added one more feather to its cap recently with the achievement of 2mn LTI free man-hours at the OCEP Gas & Condensate Export Pipelines Project in Abutubul Block-60. To mark the milestone OCEP and AHEC team organised a safety ceremony at Project Site Camp that was graced by Senior Officials of OCEP.

In September 2012, AHEC was awarded the project for the engineering support, construction, installation, inspection, testing, pre-commissioning and commissioning assistance of two export pipelines of 85km

each from Abu Tubul field, located in Oman Block-60 about 100km west of Saih Rawl to Barik plus Associated Metering Station and other facilities.

The terrain is Gravel Plain, approximately 50 per cent of route is covered with sand dunes. Some of the dunes are more than 100m high. Completion of this project is crucial as the Sales Gas and Stabilised Condensate Produced from Gas Process Plant is treated at GPP and is exported through the Pipelines to OGC SGL and PDO MOL.

OCEP project manager, Charlie Fanshawe, participated in celebrations at site congratu-

lated the OCEP-AHEC team and appreciated AHEC team for their committed efforts towards this fabulous achievement. He also mentioned that, we have more challenges ahead and he is confident that AHEC will deliver and complete the project as scheduled with high HSE and quality standards.

"At Al Hassan, the health and safety of our people is our top most priority and we are extremely proud of our performance in the field. I truly believe that together as a team we can complete this project safely and on schedule," said Maqbool Ali Salman, managing director, Al Hassan Group.
